Driving Growth Through Smart Software

SJ Infotech Malaysia is supported by its parent company, **SJ Infotech Pte. Ltd., Singapore**. Established in 2010, the Singapore headquarters has built a strong reputation for delivering innovative software engineering, enterprise technology solutions, and digital transformation services across diverse industries.

With over 15 years of industry experience, the Group combines deep technical expertise with a customer-centric approach to design, develop, and implement secure, scalable, and future-ready technology solutions. Our capabilities span custom software development, enterprise applications, cloud solutions, mobile and web applications, systems integration, IT consulting, and managed technology services.

Backed by the expertise and governance of its Singapore parent company, SJ Infotech Malaysia is committed to delivering world-class solutions that enable organizations to improve operational efficiency, accelerate digital transformation, and achieve sustainable business growth. Our focus on innovation, quality, and long-term partnerships allows us to create lasting value for clients across Malaysia and the wider region.
